

Clinical Research: Objectivity and Morality is Necessary for Integrity and Accuracy of clinical trial data

CROMNIA has been established in 2009 as a contract research organization (CRO) in Izmir, Turkey. Besides medical doctors in its clinical team, CROMNIA has a wide range of investigator database throughout the country. Depending on experienced personnel, CROMNIA provides appropriate proactive solutions and coordination with related parties to avoid and/or resolve any possible issues that may occur during a research project.

CROMNIA has a wide scope in the management of Phase II - IV of clinical and observational research projects in all therapeutic areas. In addition, CROMNIA supports Phase I studies in collaboration with Phase I Units of Medical Faculties.

We work for you with

- ✦ Qualified and specialized teams
- ✦ Cost-effective and flexible solutions in timely manner
- ✦ Well-established investigator networks
- ✦ Comprehensive factual feasibility analyses in all medical areas
- ✦ Absolute security for keeping medical records

We are in

SERVICES

SITE SELECTION AND FEASIBILITY

Feasibility study is one of the key factors for success of a clinical trial. CROMNIA has a comprehensive site selection and feasibility strategy to avoid any risks, including:

- Investigator's interest
- Trial-required facilities and related equipment
- Recruitment and retention in previous clinical trials
- Number of eligible patients expected to be recruited
- Study experience and training of site personnel

CLINICAL AND OBSERVATIONAL TRIAL MANAGEMENT

CROMNIA has experienced staff to effectively manage a clinical trial on time and on budget with success and provides the following services:

- Investigator contract
- Site initiation
- Clinical monitoring
- Vendor management
- Trial Master File management
- Drug distribution management
- Support to investigator for patient enrollment
- Close communication and cooperation both with study site and customer

REGULATORY AFFAIRS

CROMNIA team is highly experienced on regulatory affairs to be performed for a clinical trial regarding:

- Approval for the conduct of a clinical trial from Regulatory Authority (MoH) and Local Ethics Committees (LECs)
- Interaction with MoH and LECs to seek advice and agreement
- Obtaining permissions of the customs committee to import/export investigative product (IP), biologic specimens and medical equipment
- Making organization and obtaining permissions to destroy remaining IP
- Reporting to MoH and LECs

MEDICAL WRITING

In collaboration with investigators and scientists in all therapeutic areas, and with other subject matter experts, the physicians of CROMNIA have skills for medical writing including:

- Protocol writing and development
- Statistical activities
- CRF design
- Informed Consent design
- Final study report
- Documentation for congress exhibits (abstract, poster and paper, etc.)

SITE COORDINATOR SERVICES

CROMNIA provides study coordinator for supporting the sites in terms of:

- Completion of CRFs
- Drug accountability
- Trial Master File tracking
- Management of laboratory samples
- Follow-up of queries and issues to be resolved on time
- Temperature control and record
- Preparation for monitoring visits and audits

MEDICAL TRANSLATION

All members of translation team of CROMNIA are physicians and have professional experience to provide on-the-date and precise medical translation required for the conduct of a clinical trial.

INVESTIGATOR MEETING ORGANIZATION

Investigator Meeting is an important trial-related event offering an ideal occasion for the study team to get acquainted with each other and to overview the trial-specific procedures prior to initiation of the study. CROMNIA organizes Investigator Meetings and provides the following services:

- Translation / Interpreting
- Presentations and tutorial materials
- Training of study team for specific studies
- Overall organization and supervision at various venues
- Travel arrangements, accommodation and entertainment
